ROHIT KUMAR

Frontend Mobile Developer • React Native • Cross-Platform iOS & Android

Noida, India | kumarrohit35511@gmail.com | rohit-kr-portfolio.vercel.app | +91 9631128492

PROFESSIONAL SUMMARY

React Native Mobile Developer with 1.2+ years of experience building scalable, high-performance cross-platform iOS and Android applications. Proven track record delivering production-grade mobile apps with secure JWT authentication, real-time push notifications (FCM/APNs), deep linking, and optimized API data flows. Passionate about component-based architecture, clean code, and seamless user experiences.

TECHNICAL SKILLS

Mobile: React Native (CLI & Expo), iOS, Android, Cross-Platform Development, Expo Go
Languages: JavaScript (ES6+), TypeScript, React.js
State & Navigation: Redux, Redux Toolkit, Context API, React Navigation, Deep Linking
APIs & Storage: REST API, Axios, Fetch, Async Storage, Push Notifications (FCM/APNs), Socket.IO
Performance: FlatList Virtualization, useMemo/useCallback, Lazy Loading, Bundle Optimization
Tools: Git, GitHub, Postman, Android Studio, Xcode, Firebase

PROFESSIONAL EXPERIENCE

Macreel Infosoft Pvt Ltd *Feb 2025 – Present*
Software Developer – React Native & Mobile Noida, UP, India

- **Architected cross-platform React Native apps** for iOS & Android with Redux Toolkit, React Navigation, and deep linking, reducing navigation-related crashes by eliminating unhandled route transitions.
- **Delivered LCMIS** – Government of UP's production system managing civil records for thousands of users, implementing JWT authentication, role-based access control (RBAC), and secure HTTP interceptors.
- **Boosted app performance by 40%** through FlatList virtualization, memoization (useMemo/useCallback), and lazy loading, significantly improving scroll smoothness and perceived load time.
- **Integrated FCM push notifications** and real-time API data flows with Axios/Fetch, improving user retention and engagement across production mobile apps.
- Collaborated in Agile/Scrum sprints, conducted code reviews, and enforced clean component architecture and DRY principles across the team.

Green Soft *Dec 2022 – Sep 2023*
Frontend Developer (Mobile & Web) Hajipur, Bihar, India

- **Built mobile-first hybrid applications** with push notification integration (FCM), real-time features, and offline-capable API flows optimized for low-bandwidth devices.
- **Engineered reusable UI component libraries** using React Native and Ionic, accelerating feature delivery velocity across the team by ~30%.
- Secured API communication via HTTP interceptors for token injection, global error handling, and refresh token management.

KEY PROJECTS

Vakil Uncle – Legal Services Mobile App | *React Native, Socket.IO, Push Notifications, Payments*

- Built a full-featured React Native app connecting clients and advocates with in-app chat, audio calling, FCM push notifications, and Razorpay payment integration.
- Architected scalable module structure with Redux Toolkit and React Navigation deep linking, ensuring seamless multi-role user experience for lawyers and clients.

LCMIS – Government of Uttar Pradesh | *React Native, Angular, REST API, JWT, RBAC*

- Delivered production features for a government land records platform serving thousands of users under high-load conditions, with JWT auth and granular RBAC routing.

EDUCATION

Bachelor of Computer Applications (BCA) – Computer Science *2022 – Pursuing*
Babasaheb Bhimrao Ambedkar Bihar University

Intermediate (PCM) – Science *April 2022*
S.N.S. High School, Sarsai Fatehpur, Vaishali, Bihar
